

# STONE CARE GUIDE

**Congratulations** on the purchase of your new stone and thank you for choosing Hard Rock Stone Works! To keep your stone beautiful for years to come, follow these simple guidelines.

**ROCK DONE RIGHT**

- Do dust stone surfaces frequently.
- Do wipe up spills immediately.
- Do clean with a few drops of neutral cleaner (mild liquid dishwashing soap) and warm water or Stone Defender disinfectant cleaner available at Hard Rock Stone Works.

- Do thoroughly rinse and dry after cleaning; too much cleaner may leave a film and cause streaks.
- Do use a clean, microfiber cloth for best results.
- Do use antibacterial cleaners as needed. Stone Defender disinfectant cleaner is effective against bacteria and viruses, including coronavirus. Antibacterial wipes safe for stone may also be used.

- Do use a squeegee to minimize soap scum.
- Do use a non-acidic, non-ammonia cleaner to remove soap scum build-up.
- Do consider the Stone Defender Maintenance Plan including an annual in-home deep cleaning and polish, free Stone Defender disinfectant cleaner and a transferrable lifetime warranty against staining.

- Don't use scouring pads, powdered cleaners or creams. These abrasives may scratch your stone surfaces and damage the finish.
- Don't use lemon, vinegar or any other acid-based product.

- Don't use products that are acidic, they can wear away your sealer and may damage your stone's finish over time.
- Don't use ammonia-based cleaning solutions, they may eventually dull the surface of your stone.

- Don't allow water or any liquid to sit on your stone, wipe up spills immediately.
- Don't use too much cleaner, it may streak and leave a film.
- Don't worry. Stone is amazingly strong and durable. If you ever have any questions or concerns, please reach out, we're here to help!

## DO LET US KNOW HOW WE'RE DOING.

We are an independent, family-owned business that values your feedback. Visit us at [hardrockstoneworks.com](https://hardrockstoneworks.com).
